

Dr Jelica Grujić-Milanović is Associate professor of Research at Institute for Medical Research University of Belgrade. During 2000-2005. she was Assistant Trainee at Faculty of Pharmacy, University of Belgrade. Her research area is focused on the identification antioxidant and cardio protective potential of polyphenol and flavonoid compounds present in red wine or plant extracts, the identification of bonds between food lipids and cardiovascular and renal diseases. Until now, she is author and co-author of more than 98 scientific papers in total (31 peer-reviewed articles). Her articles have been cited more than 265 times, h-index is 8 (Google Scholar). She was awarded by Serbian Ministry of Science and Environment for extraordinary results achieved (2002/03) and the annual awards for research Institute for Medical Research University of Belgrade. She is a reviewer for top International Journals such as European Food Research and Technology, PLOS ONE, Drug Design, Development and Therapy, Journal of Food Science and Technology. She has participated at eight research projects: interdisciplinary, national and bilateral projects. She is the member of Serbian Pharmacological Society, European Association for Clinical Pharmacology and Therapeutics, Serbian Physiological Society, European Society of Physiology, International Society for Pathophysiology, FEPS, Serbian Society for Mitochondrial and Free Radical Physiology.

Lecture: Wine and health

Dr Jelica Grujić-Milanović je viši naučni saradnik Instituta za medicinska istraživanja, Univerziteta u Beogradu. U periodu od 2000/04 bila je saradnik u nastavi na Farmaceutskom fakultetu Univerziteta u Beogradu. Naučna istraživanja usmerena su joj na utvrđivanje antioksidativnog i kardioprotektivnog potencijala polifenolnih i flavonoidnih komponenti prisutnih u crvenom vinu ili različitim biljnim ekstraktima, kao i uticaj unosa lipida na kardiovaskulana i bubrežna oboljenja. Autor je i koautor 98 naučnih publikacija (31 recenziran rad). Njeni radovi su do sada citirani 265 puta, h-index je 8 (prema Google Scholar bazi). Dobitnik je nagrade Ministarstva nauke i zaštite životne sredine Republike Srbije za izuzetne rezultate (2002/03.), i tri puta dobitnik godišnje nagrade za najbolji naučno-istraživački rad Instituta za medicinska istraživanja Univerziteta u Beogradu. Recenzent je u vrhunskim vodećim časopisima poput: European Food Research and Technology, PLOS ONE, Drug Design, Development and Therapy, Journal of Food Science and Technology. Učestvovala je u osam istraživačkih projekata : interdisciplinarni, nacionalni, bilateralni. Član je Srpskog farmakološkog društva, European Association for Clinical Pharmacology and Therapeutics, Društva Fiziologa Srbije, European Society of Physiology, International Society for Pathophysiology, FEPS, Srpskog društva za mitohondrijalnu i slobodno-radikalnu fiziologiju.

Predavanje: Vino i zdravlje
